Installation Oracle 19c, Apex 24.1, JDK 17, ORDS 24.1 (Oracle Rest Database Service)

➢ Create an instance and connect it via SSH (PuTTy)

[opc@ords-22-4 ~]$ sudo hostnamectl set-hostname ole-19c

[opc@ords-22-4 ~]$ sudo hostnamectl set-hostname ole-19c

[opc@ords-22-4 ~]$ sudo su –

[root@ole-19c ~]# sudo vim /etc/host

[root@ole-19c ~]# sudo cat /etc/host

127.0.0.1   localhost localhost.localdomain localhost4 localhost4.localdo

10.0.0.136 ol7-19.localidomain ol7-19s

[root@ole-19c ~]# vim /etc/selinux/config

[root@ole-19c ~]# setenforce Permissive

[root@ole-19c ~]# getenforce

Permissive

[root@ole-19c ~]# sudo dnf search preinstall

Ksplice for Oracle Linux 8 (x86_64)   51 MB/s | 7.3 MB   00:00

MySQL 8.0 for Oracle Linux 8 (x86_64)   46 MB/s | 3.8 MB   00:00

MySQL 8.0 Tools Community for Oracle Linux 8 (x86 13 MB/s | 636 kB   00:00

Lets setup the environment variable now;

[root@ole-19c ~]# vim ~/.bash_profile

User specific environment and startup programs

umask 022

export ORACLE_SID=ORCLCDB

export ORACLE_BASE=/opt/oracle

export ORACLE_HOME=/opt/oracle/product/19c/dbhome_1

[root@ole-19c ~]# source .bash_profile

[root@ole-19c home]# cd oracle/

[root@ole-19c oracle]# source ./bash_profile

[oracle@ole-19c ~]$ sqlplus

SQL*Plus: Release 19.0.0.0.0 - Production on Thu Jun 20 09:31:37 2024

Version 19.3.0.0.0

Copyright (c) 1982, 2019, Oracle. All rights reserved.

Enter user-name: sys as sysdba

Enter password:

Connected to:

Oracle Database 19c Enterprise Edition Release 19.0.0.0.0 - Production

Version 19.3.0.0.0

SQL> show pdbs

```
    CON_ID CON_NAME            OPEN MODE RESTRICTED
---------------------------------------------- - - - - - - - - - - - - - -
         2 PDB$SEED            READ ONLY NO
         3 ORCLPDB1            READ WRITE NO
```

SQL> ALTER USER SYS IDENTIFIED BY Anand#123B#;

User altered.

4.3 Oracle Apex 24.1 Installation

Install Oracle APEX

➢ Copy the file download link from Oracle APEX download page.

```
mkdir downloads

cd downloads

wget https://download.oracle.com/otn_software/apex/apex_23.2_en.zip

unzip apex_23.2_en.zip -d /opt/oracle/product

--- If you plan to download 24.1 then ---

wget https://download.oracle.com/otn_software/apex/apex_24.1.zip

unzip apex_24.1.zip -d /opt/oracle/product

-- this will create apex folder at /opt/oracle/product

cd /opt/oracle/product/apex

-- connect to database as sys user

sqlplus sys@localhost:1521/FREEPDB1 as sysdba

-- run the APEX Installer script.
-- General format
-- @apxrtins.sql tablespace_apex tablespace_files tablespace_temp images

SYS> @apexins.sql SYSAUX SYSAUX TEMP /i/
```

Figure 4.15 Apex 24.1 Download with Wget

➢ Download Apex 24.1 and unzip it in your personalize directory and start installation

If you will see this the installation is successfully completed

```
ices is as follows:
http://host:port/ords/apex_admin

The structure of the link to the Oracle APEX development
ce is as follows:
http://host:port/ords

timing for: Phase 3 (Switch)
Elapsed:    0.15

timing for: Complete Installation
Elapsed:    4.75
```

Figure 4.16 Apex Installation Completed

➢ Apex Installation Completed

4.4 Oracle Apex 24.1 Configuration

```
-- change password

SYS> @apxchpwd.sql
```

Figure 4.17 Apex configuration Start

```
SQL> @apxchpwd.sql
...set_appun.sql
===============================================================
===============
This script can be used to change the password of an Ora
instance administrator. If the user does not yet exist,
ecord will be
created.
===============================================================
===============
Enter the administrator's username [ADMIN]
User "ADMIN" does not yet exist and will be created.
Enter ADMIN's email [ADMIN]
Enter ADMIN's password []
Created instance administrator ADMIN.
```

Figure 4.18 Apex Configuration Completed

```
SQL> ALTER USER APEX_PUBLIC_USER ACCOUNT UNLOCK;

SQL> ALTER USER APEX_PUBLIC_USER IDENTIFIED BY <Your-Apex-user-pawd>;
```

Figure 4.19 Apex Public User Unlocking

Note: > if you forget to unlock the APEX_PUBLIC_USER you might get following error, Account is locked 570

Account Is Locked

HTTP Status Code: 570

Request ID: ibVogKRXo6VaGScYVTKoFQ
Request Timestamp: 2024-07-03T07:49:31.052910880Z

ORDS was unable to make a connection to the database. ORDS is not able to proxy to the target user because that user is locked. The connection pool named: |default|lo|/FREEPDB1 had the following error(s): ORA-28000: The account is locked; login denied.

Figure 4.20 Error of apex

➢ if you forget to unlock the APEX_PUBLIC_USER you might get following error, Account is locked 570

- ➢ Set Ora Env

```
# . /opt/oracle/product/23ai/dbhomeFree/bin/oraenv

The Oracle base has been set to /opt/oracle
```

Figure 4.21 Setting Environment Variable for Apex

- ➢ Configuring RESTful Services and set passwords for

```
SQL> @apex_rest_config.sql

Enter the administrator's username [ADMIN]      <just hit enter button>
User "ADMIN" does not yet exist and will be created.
Enter a password for the APEX_LISTENER user              *******
Enter a password for the APEX_REST_PUBLIC_USER user      *****
```

Figure 4.22 Apex Listener User Unlock and password Creation

4.5 Download and Install JDK

Get JDK 17 URL from Java Download page.

```
cd $HOME/downloads

--Download JDK 17 --

wget https://download.oracle.com/java/17/latest/jdk-17_linux-x64_bin.rpm

ls

jdk-17_linux-x64_bin.rpm

yum -y install jdk-17_linux-x64_bin.rpm
```

Figure 4.23 JDK Download

- ➢ After Installation we should see

```
Installed: jdk-17-2000:22.0.1-8.x86_64

Complete!

# java -version

java version "17.0.1"

-- or you might see the one below

java version "17.0.11" 2024-04-16 LTS
Java(TM) SE Runtime Environment (build 17.0.11+7-LTS-207)
Java HotSpot(TM) 64-Bit Server VM (build 17.0.11+7-LTS-207, mixed mode, sharing)
```

Figure 4.24 JDK Installation Complete

4.6 ORDS 24.1(Oracle Rest Database Service) Installation

Install ORDS

```
# yum install ords

Package ords-24.1.0-16.el8.noarch is installed.
Dependencies resolved.

-- or you might see the one below --

Installed:
ords-24.2.0-6.el8.noarch
```

Figure 4.25 ORDS Install

➤ Install Ords with yum command and after installation configuration start

4.7 ORDS 24.1(Oracle Rest Database Service) Configuration

Most Important step here is to configure ORDS.

[opc@devdb23ai ~]$ sudo su -
Last login: Mon May 6 17:15:19 GMT 2024 on pts/0

 # ords --config /etc/ords/config install

ORDS: Release 24.1 Production on Mon May 06 18:43:46 2024

Copyright (c) 2010, 2024, Oracle.

Configuration:
 /etc/ords/config
...
Enter a number to select the TNS net service name to use or specify the database connection
  [1] FREE   SERVICE_NAME=FREE
  [S] Specify the database connection
 Choose [1]: 1
...
Provide database username with administrator privileges.
  Enter the administrator username: SYS

Enter the database password for SYS AS SYSDBA: *****
....
PDB FREEPDB1 - install ORDS 24.1.0.r1080942
PDB FREEPDB1 - configure PL/SQL gateway user APEX_PUBLIC_USER in ORDS version 24.1.0.r1080942
...
Install ORDS in the database
   [1] Yes
   [2] No
  Choose [1]: 1
...
Enter a number to update the value or select option A to Accept and Continue
   [1] Connection Type: TNS
   [2]   TNS   Connection: TNS_NAME=FREE
TNS_FOLDER=/opt/oracle/product/23ai/dbhomeFree/network/admin
        Administrator User: SYS AS SYSDBA
   [3] Database password for ORDS runtime user (ORDS_PUBLIC_USER):
<generate>
   [4] ORDS runtime user and schema tablespaces: Default: SYSAUX
Temporary TEMP
   [5] Additional Feature: Database Actions
   [6] Configure and start ORDS in Standalone Mode: Yes
   [7]   Protocol: HTTP
   [8]   HTTP Port: 8080
   [9]   APEX static resources location:
   [A] Accept and Continue - Create configuration and Install ORDS in the database
   [Q] Quit - Do not proceed. No changes
  Choose [A]: A
...
standalone.static.context.path=/ords
database.api.enabled=true
db.username=ORDS_PUBLIC_USER
standalone.http.port=8080
restEnabledSql.active=true
resource.templates.enabled=false
plsql.gateway.mode=proxied
feature.sdw=true
config.required=true
db.connectionType=tns

....
Oracle REST Data Services version: 24.1.0.r1080942
Oracle REST Data Services server info: jetty/10.0.20
Oracle REST Data Services java info: Java Hotspot(TM) 64-Bit Server VM 22.0.1+8-16
Note >: if the above installation does not return back to command prompt, then press control + c button on keyboard to proceed.

Start ORDS

```
# /etc/init.d/ords start
INFO: Starting Oracle REST Data Services...
INFO: Oracle REST Data Services started with PID 64712
INFO: Obtaining the port binding information...
INFO: Oracle REST Data Services is bounded to ports 8080
```

Figure 4.26 Start ORDS

Set up network and open Linux firewall ports.
Please check step 1 while setting up compute instance to open any required network ports on cloud.oracle.com VCN.

In the Linux console we will alter the firewall settings as shown below.

```
firewall-cmd --permanent --zone=public  --add-port=1521/tcp
firewall-cmd --permanent --zone=public  --add-port=8080/tcp
firewall-cmd --reload
```

Figure 4.27 Adding Port in Firewall

Access Oracle APEX environment
Reality check access http://<your-public-ip>:8080/ords

Figure 4.28 Oracle Apex Front Page

Figure 4.29 Apex Login

Change PDB to freepdb1 and click on Go button.

You may get this following error message.
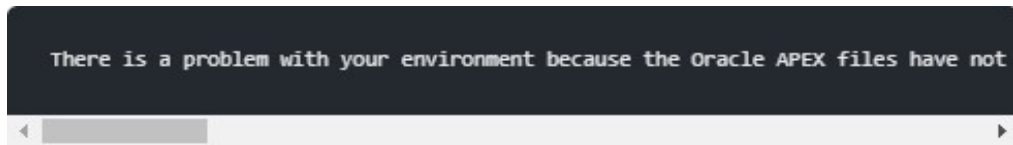

Figure 4.30 Error of apex while login with freepdb

Figure 4.31 Apex Page Not load perfectly

How do we fix this issue? The APEX page seems to be broken.
Troubleshooting APEX Installation
In your VSCode create a Database connection as shown below.
Figure 4.32 Download Extension in VS Code

I have installed SQL Developer Extension for VSCode and created a database connection as SYS user
Connection Parameters:
Hostname <Public IP Address>
User SYS as SYSDBA, Port 1521 and Service Name as FREEPDB1
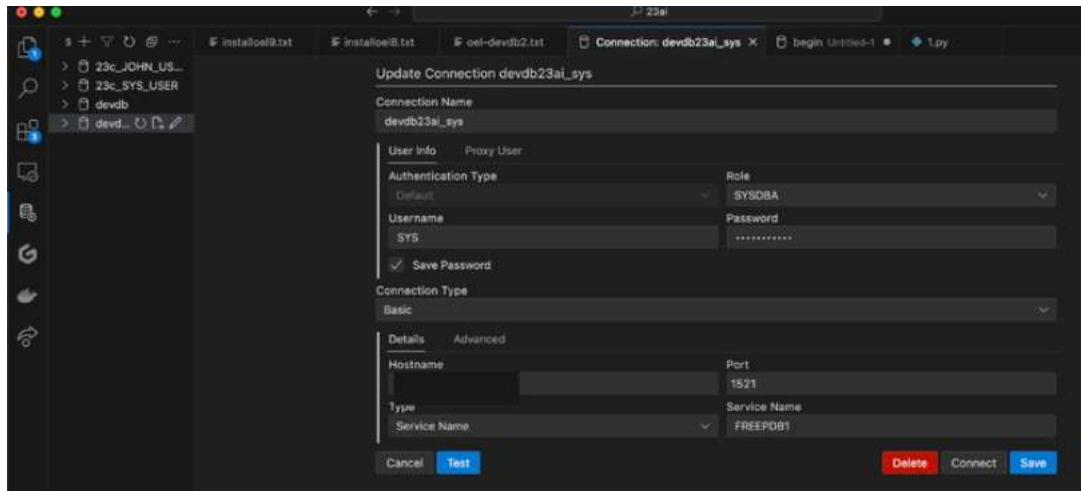

Figure 4.33 Setup Oracle DB in VS Code

Open the worksheet. And run this
begin
apex_instance_admin.set_parameter(p_parameter => 'IMAGE_PREFIX',
                    p_value => 'https://static.oracle.com/cdn/apex/23.2.0/');
commit;
end;

if you have a different version of APEX installed the CDN URL might change
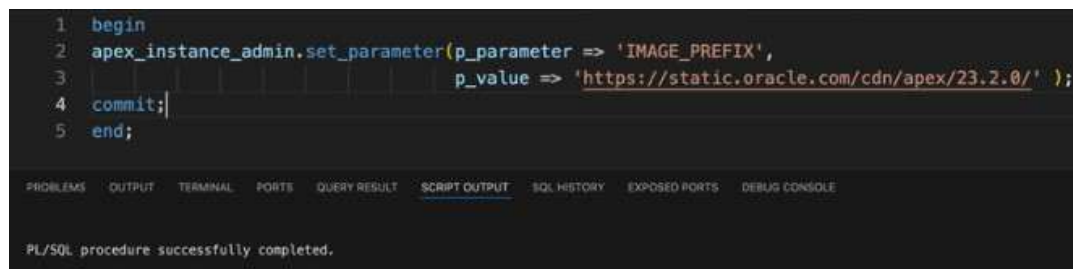

Figure 4.34 run a command in DB in VS Code

Now let us access the ORACLE APEX page again at http://<public-ip>:8080/ords and then select Oracle APEX
This works like a charm
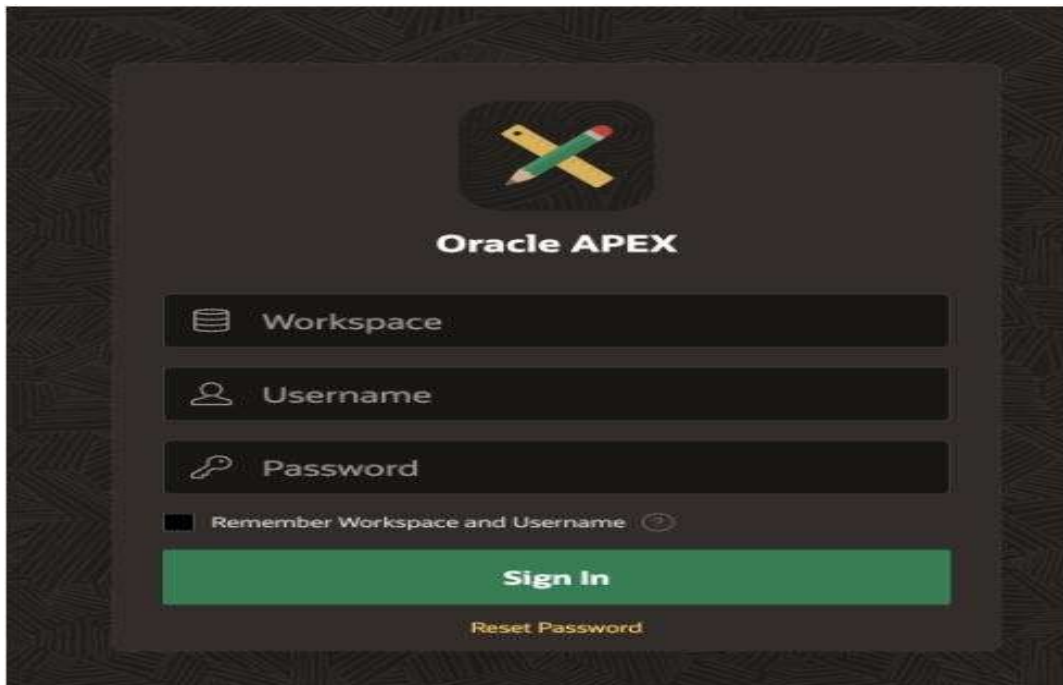

Figure 4.35 Oracle Apex Front Page

Create Oracle APEX workspace
Login as ADMIN user into INTERNAL workspace
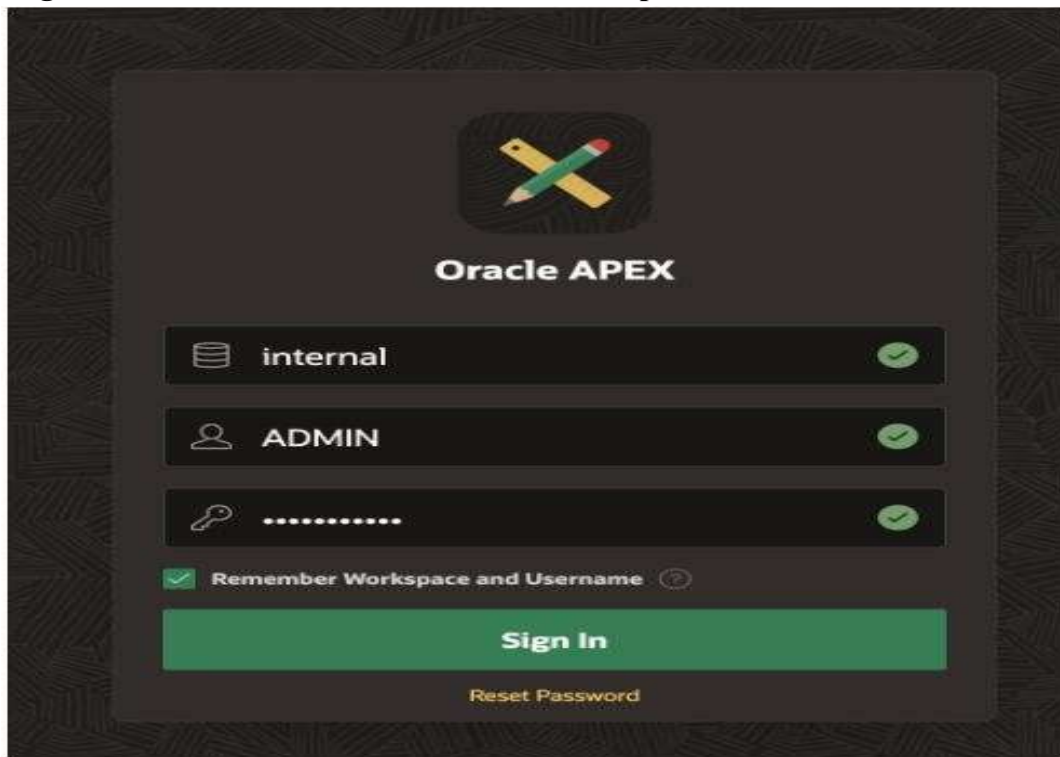

Figure 4.36 Login in Apex with Admin User

4.8 Workspace Creation in Apex

Click on Create Workspace
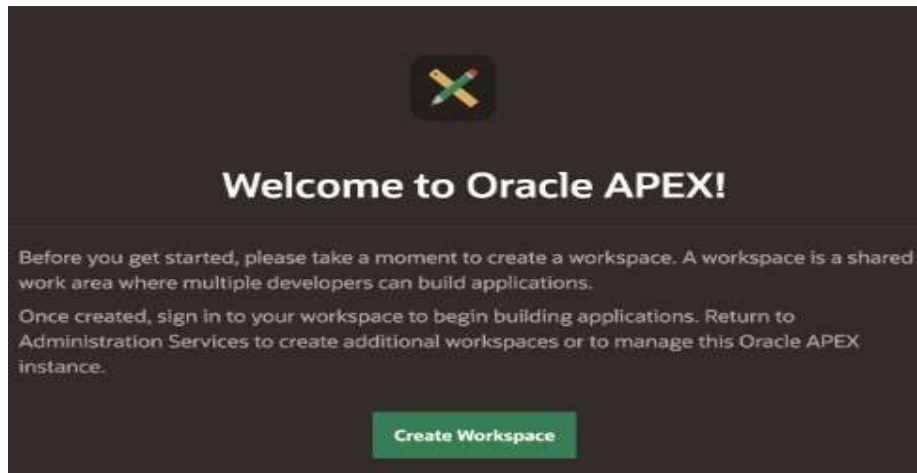

Figure 4.37 Creating Workspace in Apex

Protect Workspace Name, Workspace Description

Figure 4.38 Identifying Workspace

Re-use existing schema = Yes (since we already have created user)
Schema Name <Select from the one shown in the list>

Figure 4.39 Identifying Schema

Provide Admin username and password.

Figure 4.40 User Creation on Apex Workspace

Click Next and Create Workspace

Figure 4.41 Error of apex

After entering all details create workspace

Login to our new workspace with the user previously created in Step 5.

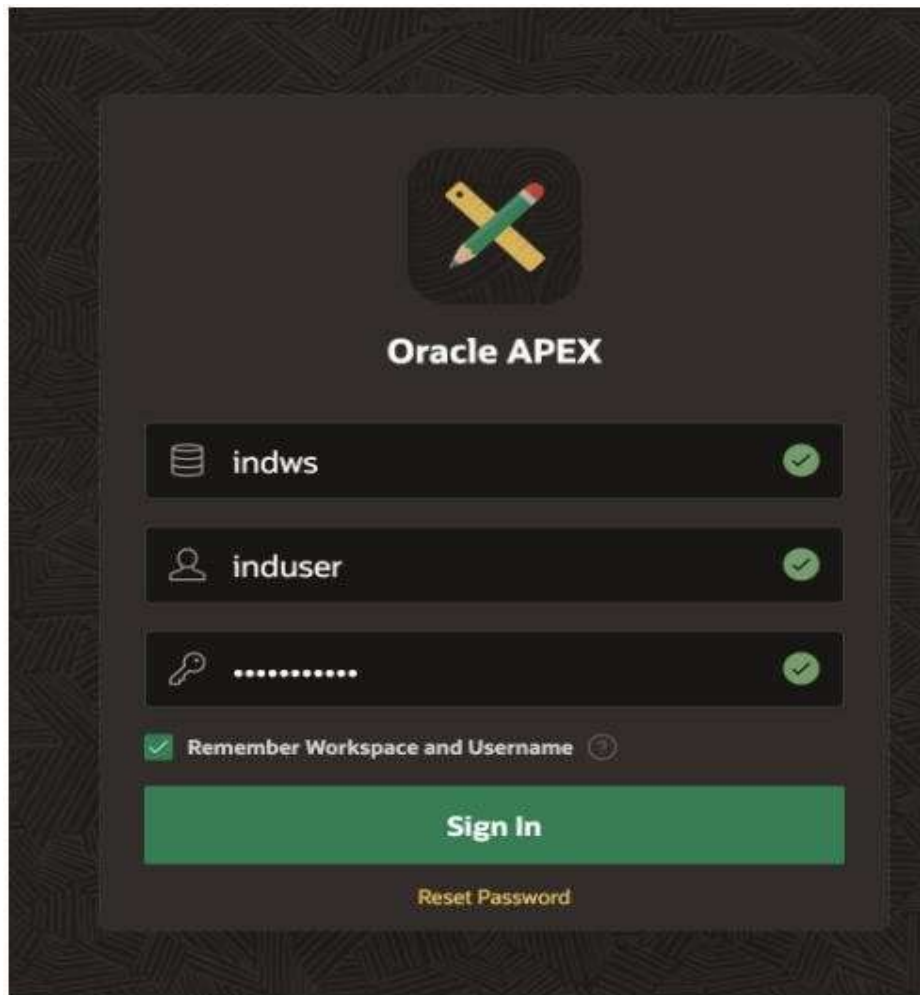

Figure 4.42 Login with Created User

Sign in to APEX workspace.

Figure 4.43 Dashboard of Apex
