

TMA Information

- i. Answers must be written by hand.
- ii. Spiral/book binding.
- iii. Do not copy from others.
- iv. Deadline for submission on practical examination day of 1303.

Questions:

- Previous year's all TMA questions (batch 221 which was batch 231's TMA).

&

19	Determine the roots of the quadratic equation $ax^2 + bx + c = 0$ using the well known quadratic formula: $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$
20	Create a Basic Calculator using user defined functions in C. Design and implement a basic calculator application. The program should first present the user with a menu of arithmetic operations: 1 for Addition 2 for Subtraction 3 for Multiplication 4 for Division Upon selection, prompt the user to input two numerical values. Create a distinct user-defined function for each of the four operations. The application must then invoke the correct function based on the user's choice and clearly display the final calculated result.

Record Book Information:

- Answers in computer printed form.
- Spiral/book binding.
- Do not copy from others.
- Deadline for submission on practical examination day of 1303.

Questions:

- Minimum 10(ten) exercises sir solved in classes.

Follow the format for each lab mentioned below:

- Title
- Objectives
- Theory

- iv. Working diagrams
- v. Apparatus
- vi. Procedure
- vii. Results
- viii. Discussion and conclusion

I (Mahbubur Rahman Sarker) have covered the following in my Record Book as per my own choice.

01	Understanding Input/Output Operations and Statement Types in C Programming.
02	Conditional Number Display using if Statement.
03	Even/Odd Number Checker using if-else Statement.
04	Employee Monthly Salary Calculation with Conditional Allowances.
05	Bank Monthly Balance Bonus Calculation.
06	Benefits of Nested If-Else Statements in C.
07	Student Grade Calculation using If-Else If Ladder.
08	Employee Salary Calculation using If-Else If Ladder.
09	Printing Numbers with a While Loop in C.
10	Multiplication Table using Do-While Loop in C.
11	Summation of a Polynomial Series.
12	Pattern Printing in C using Loops.

13	Summation of a Digit Series.
14	Text Input Program in C.
15	Structure Initialization in C Programming.
