Feedback on your performance is printed below. The report lists the objectives for which you answered a question incorrectly.

- Control the run-time privileges of a subprogram
- Create database triggers
- Describe different types of triggers and their uses
- Describe the execution flow of SQL statements
- Differentiate between anonymous blocks and subprograms, use a modularized and layered subprogram design, and identify the benefits of subprograms
- Make use of the INTO clause to hold the values returned by a SQL statement
- Manage persistent package data states for the life of a session and use PL/SQL tables and records in packages
- Track and manage procedural dependencies
- Use built-in SQL functions in PL/SQL and sequences in PL/SQL expressions
- Use the new PL/SQL compiler initialization parameters
- Work with functions (create, invoke and remove functions)

If this is the final exam in your certification path, you are required to complete the following steps.

- Visit certification.oracle.com and select your certification path to ensure you are aware of all certification requirements.
 - Note that completion of the required training and approval of the course submission form are also required in paths that require training.
- Check certview.oracle.com to confirm that all completed components are in your profile.
 - If exams that you have taken do not show up, you may have taken them under a different Oracle Testing ID.
 - Contact www.pearsonvue.com/oracle/contact to merge your IDs (provide all IDs under which you have taken exams or submitted forms and confirm which ID should be the 'surviving id').
