

Oracle APEX Cloud Developer Professional: 1Z0-771

1. Which client credentials are used for authentication during the One-Click Remote Application Deployment process?
 - Database schema credentials
 - APEX Workspace Admin credentials
 - APEX Developer credentials
2. Which search type in Search Configurations provides linguistic and fuzzy search capabilities?
 - Standard
 - Oracle Text
 - List
3. Which two feature pages can you create using the Create Page Wizard?
 - Access Control
 - Search Page
 - Feedback
 - Unified Task List
4. [Image]
Which two actions does the Create Application Wizard allow?
 - Reordering application pages
 - Adding or deleting application pages
 - Uploading JavaScript or CSS files required for an application
 - Changing the application authorization
5. Which two tasks are performed by using SQL Workshop?
 - Install and manage Sample Apps
 - Edit an application page
 - Track and manage issues in a conversational fashion
 - Create join queries by using drag-and-drop
 - Load and unload text, DDL, and spreadsheet data
6. Which type of code can be generated by using Query Builder mode in the APEX Assistant?
 - JavaScript
 - SQL
 - CSS
7. [Image]
How may I help you today?
You need to ensure that “How may I help you today” is the first message displayed by the AI assistant?
Which attribute of the **Show AI Assistant** Dynamic Action should be configured in the Property Editor to achieve this?
 - Welcome Message
 - System Prompt
 - Quick Actions
8. What are two reasons to enable the Used by App Builder option while creating a Generative AI Service?
 - To create a REST-enabled database object
 - To build applications using natural language powered by Generative AI
 - To create a Working Copy of your application
 - To author SQL powered by Generative AI
9. You must reference certain data from a dragged event under the Drag and Drop PL/SQL Code attribute of the Calendar component.
Examine this list:
 - 1.ID
 - 2.NEW_START_DATE
 - 3.NEW_END_DATE

Oracle APEX Cloud Developer Professional: 1Z0-771

How can these be referenced?

- `:APEX.PK_VALUE`, `:APEX.NEW_START_DATE`, and `:APEX.NEW_END_DATE`
- `#APEX$PK_VALUE#`, `#APEX$NEW_START_DATE#`, and `#APEX$NEW_END_DATE#`
- `#APEX.PK_VALUE#`, `#APEX.NEW_START_DATE#`, and `#APEX.NEW_END_DATE#`
- `:APEX$PK_VALUE`, `:APEX$NEW_START_DATE`, and `$APEX$NEW_END_DATE`

10. Which two functions can be used by an end user when pivoting an interactive report?

- List aggregate
- Median
- Rank
- Minimum

11. Which statement is true about Theme Styles in Oracle APEX?

- They determine the layout and structure of a webpage
- When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment
- You can enable the Is Current attribute only when the Theme Style has the Read Only attribute disabled

12. Which two Plugin types can be created in Oracle APEX?

- Region
- Process
- Validation
- Email Template

13. There is a page with an interactive grid region based on this statement:

```
SELECT EMPNO, ENAME, COMM FROM EMP;
```

In the Interactive Grid attributes, in the Edit group, the Enabled switch is turned off.

Which two actions must be performed to make an employee's commission editable in the grid?

- In the Interactive Grid attributes, in the Edit group, turn on the Enabled switch
- Ensure that the Primary Key switch is turned on for the EMPNO column
- Set EMPNO, ENAME to Display Only
- In the Interactive Grid attributes, select COMM for Allowed Row Operations Column

14. Which statement is true about creating and using a report with a form?

- In the Create Application Wizard, you can select a data source (that is, Local Database, REST Enabled SQL Service, or REST Data Source)
- The Create Page Wizard doesn't support the creation of a classic report and form combination
- The Create Application Wizard doesn't support the creation of an interactive report and form combination
- Both the Create Application Wizard and Create Page Wizard support the creation of an interactive report or classic report and form combination

15. Which two Query Source types can be used to create a dynamic Navigation Bar List?

- SQL Query
- Function Returning SQL Query
- Select List
- Procedure

16. Which Action is used to open an AI chat assistant by using a Dynamic Action?

- Show AI Assistant
- Open Generative AI
- Generate Text with AI

17. You must use a Static Content region type to display message about the employees of the month. Employee names are stored in the P1_ENAME page item.

Which text, when placed in source, will display the message correctly?

- Join me in congratulating: P1_ENAME as the new employee of the month

Oracle APEX Cloud Developer Professional: 1Z0-771

- Join me in congratulating V('P1_ENAME') as the new employee of the month
- **Join me in congratulating &P1_ENAME. As the new employee of the month**

18. Which statement is true about importing an APEX application?

- **You cannot import an APEX application exported from the latest APEX version to an old APEX version**
- You cannot change the application ID during the import process
- The import process does not import the supporting objects defined during the export

19. [Image]

Now you must extend the functionality of this form so that:

- ➔ If you select 'SALESMAN' from the select list for the Job page item, both the 'Hire date' (P2_HIREDATE) and 'Commission' (P2_COMM) page items and their associated labels displayed
- ➔ If you select any other value from the select list for the Job page item (P2_JOB), both the 'Hire date' (P2_HIREDATE) and 'Commission' (P2_COMM) page items and their associated labels are hidden.

Which two steps must be performed?

- Create a dynamic action on P2_JOB, P2_HIREDATE, and P2_COMM
- **Create a dynamic action on P2_JOB**
- Create a dynamic action on P2_HIREDATE and P2_COMM
- Create a dynamic action on form load
- **Specify a client-side condition of type item = value and enter SALESMAN for value**

20. Which authentication schema type supports authentication with social network and enterprise identify providers that support OpenID Connect or OAuth2 standards?

- SAML Sign-In
- Open Door Credentials
- HTTP Header Variable
- **Social Sign-In**

21. An application includes a report and form on the PRODUCTS table.

The form page includes page items P21_PRODUCT_NAME and P21_UNIT_PRICE.

P21_UNIT_PRICE is currently displayed below P21_PRODUCT_NAME

You need to reposition the items and display P21_UNIT_PRICE next to P21_PRODUCT_NAME.

Which two actions can be performed in page designer to achieve this?

- **Use the Middle Pane, click P21_UNIT_PRICE, and drag the item directly next to P21_PRODUCT_NAME**
- **Select P21_PRODUCT_NAME and then, in the Property Editor, under Layout, set Start New Row to Yes**
- Select P21_PRODUCT_NAME and then, in the Property Editor, under Layout, set Start New Row to No
- Right-click P21_UNIT_PRICE and select Start New Row

22. Which two statement are true about creating and managing an APEX Word space?

- **During workspace creation, you can associate the workspace with an existing database schema**
- **A workspace enables multiple users to work within the same Oracle APEX installation**
- New schemas cannot be created during workspace creation
- A workspace can be associated with only one schema
- You can create only two workspaces in an APEX Service (APEX Application Development) instance

23. What happens when you regenerate credentials for Push Notifications?

- **Existing Push Subscriptions for the application will be invalidated**
- Queued Push Notifications for the application will be sent
- Existing Push Subscriptions for the application will be valid

24. Which API can be used to send push notification immediately from the notification queue?

- **APEX_PWA.PUSH_QUEUE**
- APEX_PWA.PURGE_QUEUE
- APEX_PWA.HAS_PUSH_SUBSCRIPTION

Oracle APEX Cloud Developer Professional: 1Z0-771

25. An APEX e-commerce application is being used by 50 users. You have a promotional offer and you need to send a Push notification to all the subscribed users on their devices.
Which step must be performed in Oracle APEX to achieve this?
- Create a Dynamic Action of Send Push Notification type to send push notifications to all the subscribed users
 - Create a REST Data Source to send push notifications to all the subscribed users
 - Create a PLSQL block to fetch all the subscribed users and send push notifications by using APEX_APPL_PUSH_SUBSCRIPTIONS & APEX_PWA.SEND_PUSH_NOTIFICATION
26. Examine this code entered in Quick SQL:
- ```
Emp_salary
Name vc255
Salary num
Commission_yn / check TRUE, FALSE
```
- Which statement is true about the commission\_yn column?
- It will restrict acceptable values to TRUE or FALSE
  - It will default to FALSE
  - It will default to TRUE
  - It will restrict acceptable values to Y or N
27. Which two statements are true about REST Data Source Synchronization?
- If the local table is not in sync with the Data Profile, Data Synchronization doesn't work
  - To execute REST source synchronizations on schedule, the CREATE JOB privilege must be granted to the application's parsing schema
  - You cannot trigger Data Synchronization on a regular schedule using a scheduler job
  - If the local table is not in sync with the Data Profile, Data Synchronization continues to work for columns present in both the table and the Data Profile
  - The local table can only be used for Data Synchronization but you cannot add indexes or change physical properties
28. In your APEX application, you want to have an orderly grid layout of information tiles.  
Which page type should you choose in the Create Page Wizard?
- Master Detail
  - Interactive Grid
  - Cards
  - Unified Task List
29. Which step is mandatory to make an existing Oracle APEX application a Progressive Web App (PWA)?
- Add custom JavaScript to support offline functionality
  - Verify that Friendly URLs are turned on in the Application Definition
  - Enable RESTful Web Services in the application
30. Which statement is true about creating and using an interactive grid?
- For both editable and noneditable interactive grids, end users can change the report layout and create private reports
  - End users cannot rearrange columns by dragging and dropping
  - An interactive grid supports Pivot View and Group By View features
31. Which is a valid Page Process type?
- Execute JavaScript Code
  - Send E-Mail
  - Set Value
32. Which Process type do you use to run multiple processes in the background from your Oracle APEX application?
- Execute Server-side Code
  - Execution Chain

## Oracle APEX Cloud Developer Professional: 1Z0-771

- Execute JavaScript Code
- Execute Code

33. Which two are prerequisites to use the REST-enabled SQL feature in Oracle APEX?

- Install Oracle APEX in the remote Oracle Database
- Create a database link to the remote Oracle Database in the local APEX schema
- **REST-enable the schema in the remote Oracle Database by using ORDS.ENABLE\_SCHEMA**
- **Install ORDS 19.x or later on the remote Oracle Database**

34. You created a shopping cart application and added the “Add to Cart” functionality. You are using an APEX Collection named CART to temporarily store the items in the cart.

Assume: P2\_PRODUCT\_ID holds the product id of the item being added to the cart.

Which PL/SQL Code snippet can be used to add items (PRODUCT\_ID) into this APEX collection when the user adds items to the cart?

- BEGIN  
    INSERT INTO APEX\_COLLECTION (id, name, c001) values (1, 'CART', ':P2\_PRODUCT\_ID');  
END;
- BEGIN  
    INSERT INTO CART (id, c001) values (1, ':P2\_PRODUCT\_ID');  
END;
- **BEGIN  
    APEX\_COLLECTION.ADD\_MEMBER (  
    P\_collection\_name => 'CART',  
    P\_c001 => P2\_PRODUCT\_ID);  
END;**

35. Which two actions are performed by using the Object Browser?

- Create and run SQL scripts
- Restore dropped database objects
- **Create a lookup table based on a column in the current table**
- **Browse database objects of the current schema**
- Export and import SQL scripts

36. You created a custom theme for an application.

Examine these requirements:

- ➔ The theme must be utilized by another application in the same workspace
- ➔ The master theme may still require changes

Which solution guarantees that any changes to the master theme are reflected in the copied theme?

- Refreshing the templates
- Verifying the theme subscription
- **Subscribing the copied theme to the master theme and refreshing the theme**
- Copying the changes made in the master theme to the copied theme

37. Which is NOT an available Geometry Column data type for the maps region?

- GeoJSON
- Latitude/Longitude
- SDO\_GEOMETRY
- **JSON\_OBJECT**

38. Which is a valid method of logging message to the execution log in APEX automation?

- **Apex\_automation.log\_info('SAL for ' || :ENAME || ' increased by 1%.');**
- Apex\_debug.info ('SAL for ' || :ENAME || ' increased by 1%.');

## Oracle APEX Cloud Developer Professional: 1Z0-771

- Apex\_error.add\_error (  
P\_message => 'SAL for ' || :ENAME || ' increased by 1%.',  
P\_display\_location => apex\_error.c\_inline\_in\_notification );
39. What is the **Unified Task List** in the Approvals component?
- A page type in the Create Page Wizard that is used to create a summary of tasks that functions like an inbox
  - A shared component used to configure task parameters, participants, actions, and due dates
  - A page that shows details for a specific task, which can include metadata, history, comments, and actions
40. Which two statements are true about the APEX\_MAIL API?
- You can add files as attachments to your email using the APEX\_MAIL package
  - You can receive emails using the APEX\_MAIL package in an Oracle APEX application
  - You can send emails using the APEX\_MAIL package from an Oracle APEX application
  - The APEX\_MAIL package supports sending emails only to Oracle database users
41. Which two statements are true about loading data from the "Create App From a File" wizard?
- Seed data from a SQL script can be uploaded
  - CSV, XLSX, XML, TXT, or JSON files can be uploaded
  - XML and JSON data can be pasted and loaded
  - A sample data set from the sample list can be uploaded
  - Data from remote web services can be uploaded
42. What do you achieve by performing the Refresh Working Copy task?
- Merge the working copy changes with the main application
  - Get the latest updates from the main application
  - Update the changes from one working copy to another
43. Which two are valid evaluation points for Authorization Schemes?
- Once per session
  - Never
  - One per page view
  - Once per user
44. How many instances of a workflow can exist in the In Development state?
- 50
  - 1
  - Unlimited
45. You must create a single master detail page where users can select a row in the master grid to update the detail grids. Users must also interact with the master or the detail without leaving the page. Which type of master detail implementation should you use?
- Drill Down
  - Stacked
  - Side by Side
46. Which three Theme Components is available out-of-the-box with Universal Theme in Oracle APEX?
- Badge
  - Avatar
  - Calendar
  - Comments
  - REST Data Sources
47. Which statement is true about the Data Workshop utility?
- You cannot load data from an XLSX file with multiple worksheets
  - You can load or unload multiple tables at a time
  - The wizards load and unload all types of schema objects

## Oracle APEX Cloud Developer Professional: 1Z0-771

- The wizards load and unload table data only
48. In a faceted search page, facets can be displayed as different UI types.  
Which two facet item types are supported in the faceted search region?
- Popup LOV
  - Range
  - Checkbox Group
  - Date Picker
49. Which two statements are true about Faceted Search pages?
- Faceted Search supports the ability to filter columns storing multiple values as one string
  - Multiple charts are not visible in the same region
  - A facet's chart can be seen only in a nonmodal dialog
  - Facets map to specific database columns
50. Which two statements are true about creating and customizing Smart Filters pages?
- The suggestion chip count is displayed only for filters that support counts, such as LOV-based filter types
  - The search results report can be displayed as an interactive report
  - The search results report can be displayed as an interactive grid
  - If you create a Smart Filters page based on a table, the filters are auto-discovered by using the Data Dictionary Cache.
51. Which two layout modes are available for Page Designer under Utilities?
- Two Pane
  - Three Pane
  - Single Pane
  - Four Pane
52. Which two quick actions are available in General Assistance mode of the APEX Assistant?
- Purge Selection
  - Improve Selection
  - Debug Selection
  - Explain Selection
53. Which two AI service providers are supported by Oracle APEX?
- Jarvis
  - OpenAI
  - OCI Document AI
  - OCI Generative AI
54. At which level does a developer enable push notifications so that end users can receive them on their devices from an APEX application?
- Instance
  - Application
  - Page
  - Region
55. You require a page computation to execute **before** the page is rendered. Which two computation points will do this?
- After Header
  - After Submit
  - After Page Processing
  - Before Header
56. You have an Interactive Grid component and you are enabling the **Save Public Report** attribute. As what can end users save the report type?
- As Private Only

## Oracle APEX Cloud Developer Professional: 1Z0-771

- As Public Only
  - As Primary Only
  - **As Private and Public Only**
57. Where do you create a workflow in an APEX application?
- Dynamic Action
  - **Shared Components**
  - Workspace Utilities
58. Which action is used to open the **AI Chat Assistant** by using a Dynamic Action?
- Open Generic AI
  - **Open AI Assistant**
  - Generate text with AI
59. Which two statements are true when an end user is customizing an Interactive Report?
- **A flashback query can be executed**
  - **Mathematical computations can be added to a column**
  - Standard Oracle functions cannot be added to a column
  - Multiple charts can be created from the Actions menu
60. You add **Access Control** feature pages to your application. Which two actions can an administrator perform by using the **Administration** page?
- Create Authorization Schemes
  - **Add Users**
  - Create Application Roles
  - **Assign Roles to Users**
61. Which two tasks are performed by using **App Builder** in Oracle APEX?
- Generate a Data Definition Language (DDL) statement from the Oracle dictionary
  - Create a join query by using drag and drop
  - **Import previously created apps**
  - Create/manage data objects
  - **Create/manage apps**
62. Which statement is true when using SQL commands in Oracle APEX?
- You can upload data from the database
  - In SQL Commands, you can view queries saved in Query Builder
  - **You can search and filter database objects**
  - You can design and prototype data models by using a markdown-like shorthand syntax
