

# Overview

This guide walks you through creating a custom PDF in Oracle APEX using the jsPDF library.

## How do we do

### Step 1:

Create necessary page items to get user details from user. Add a button to your page, for example, labeled "Generate PDF". Set button action to "Defined by Dynamic Action" .

The screenshot displays a user profile form in an Oracle APEX environment. It features three stacked text input fields labeled 'Name', 'Email Id', and 'Phone Number'. Below these fields is a blue button labeled 'Generate Pdf'. To the right of the input fields is a 'Profile' section, indicated by a red asterisk, which contains a user icon.

### Step 2:

Include the jsPDF Library: Go to Page Designer > JavaScript > File URLs.

Add this CDN URL for the jsPDF library:

<https://cdnjs.cloudflare.com/ajax/libs/jspdf/2.5.1/jspdf.umd.min.js>

### Step 3:

Create a Dynamic Action,

Event: Click

Selection Type: Button

Add JavaScript Code to Generate the PDF, Add a True Action of type Execute JavaScript Code.

### JavaScript Code:

```
// Import jsPDF from the global window object
var { jsPDF } = window.jspdf;

// Gather form values from page items
var ename = $v('P8_NAME');
var email = $v('P8_EMAIL_ID');
var phone = $v('P8_PHONE_NUMBER');

// Function to generate and download the PDF with optional image
function generatePDFWithImage(imgDataUrl) {
    var doc = new jsPDF();

    // PAGE DIMENSIONS
    var pageWidth = doc.internal.pageSize.getWidth();

    // --- MAIN HEADING ---
    doc.setFont("helvetica", "bold");
    doc.setFontSize(24);
    doc.setTextColor(10, 10, 80);
    var mainTitle = 'My Custom PDF Report';
    var textWidth = doc.getTextWidth(mainTitle);
    var xPos = (pageWidth - textWidth) / 2; // Center horizontally
    var yPos = 18; // Vertical position from top
    doc.text(mainTitle, xPos, yPos);

    // --- SECTION BORDER ---
    var sectionX = 15,
        sectionY = 30,
        sectionW = 180,
        sectionH = 80;
    doc.setDrawColor(0, 150, 200); // Light blue border
```

```
doc.setLineWidth(1.5);
doc.rect(sectionX, sectionY, sectionW, sectionH);

// --- SECTION TITLE ---
doc.setFont("helvetica", "bold");
doc.setFontSize(18);
doc.setTextColor(40, 40, 120);
doc.text('User Profile', sectionX + 5, sectionY + 12);

// --- USER DETAILS (LEFT SIDE) ---
var leftX = sectionX + 8;
var valX = leftX + 35;
var startY = sectionY + 25;
var lineHeight = 14;

// Name Label & Value
doc.setFont("helvetica", "bold");
doc.setFontSize(12);
doc.setTextColor(0, 102, 204); // Blue
doc.text('Name:', leftX, startY);
doc.setFont("helvetica", "normal");
doc.setTextColor(60, 60, 60); // Dark gray
doc.text(ename, valX, startY);

// Email Label & Value
doc.setFont("helvetica", "bold");
doc.setTextColor(0, 102, 204);
doc.text('Email:', leftX, startY + lineHeight);
doc.setFont("helvetica", "normal");
doc.setTextColor(60, 60, 60);
doc.text(email, valX, startY + lineHeight);

// Phone Label & Value
doc.setFont("helvetica", "bold");
doc.setTextColor(0, 102, 204);
doc.text('Phone:', leftX, startY + 2 * lineHeight);
doc.setFont("helvetica", "normal");
doc.setTextColor(60, 60, 60);
doc.text(phone, valX, startY + 2 * lineHeight);
```

```

// --- PROFILE IMAGE (RIGHT SIDE) ---
var imgW = 50;
var imgH = 50;
var imgX = sectionX + sectionW - imgW - 10;
var imgY = sectionY + 15;

if (imgDataUrl) {
    // Draw border around image
    doc.setDrawColor(160, 160, 160); // Gray border
    doc.setLineWidth(1);
    doc.rect(imgX - 2, imgY - 2, imgW + 4, imgH + 4);
    // Add image
    doc.drawImage(imgDataUrl, 'JPEG', imgX, imgY, imgW, imgH);
} else {
    // If no image, display placeholder text
    doc.setFontSize(11);
    doc.setTextColor(140, 140, 140);
    doc.text('No Profile Picture', imgX, imgY + imgH / 2);
}

// --- VERTICAL SEPARATOR LINE ---
var sepX = imgX - 13;
doc.setDrawColor(200, 220, 255);
doc.setLineWidth(1);
doc.line(sepX, sectionY + 8, sepX, sectionY + sectionH - 8);

// Save/download the PDF file
doc.save('UserDetails.pdf');
}

// Convert file input (file browse) image to base64 DataURL and
generate PDF
var fileInput = document.getElementById('P8_PROFILE');
if (fileInput && fileInput.files && fileInput.files[0]) {
    var reader = new FileReader();
    reader.onload = function(e) {
        generatePDFWithImage(e.target.result);
    };
    reader.readAsDataURL(fileInput.files[0]);
} else {

```

```
generatePDFWithImage(null);  
}
```

## Output:

Name  
John

Email Id  
Johnsampleemail@gmail.com

Phone Number  
1234567890

Profile \*
