Re: Application for Software Developer — Internet & Mobile Banking

Dear Hiring Team,

I am Ayub Miaze, an Oracle Developer from Dhaka with more than four years of experience in Core Banking, Agent Banking, and eKYC systems for leading financial institutions in Bangladesh, including The City Bank PLC, Sonali Bank PLC, Bank Asia, and Palli Sanchay Bank. I am writing to express my strong interest in the Software Developer role focused on internet and mobile banking systems.

Why Synpulse?

Synpulse's global presence, Swiss-rooted precision, and focus on real impact in financial services strongly attract me. I am especially inspired by your culture of initiative, entrepreneurial thinking, and transformation in banking. Your values of Embrace, Drive, and Achieve closely align with my professional mindset.

What I Bring to This Role?

At ERA Infotech BD LTD., I have worked across the full SDLC including design, development, testing, and deployment of Core Banking and Agent Banking solutions. My technical expertise includes Oracle PL/SQL, Oracle APEX development, REST/SOAP API integration, and optimizing high-volume banking systems. I have also migrated Oracle Forms to APEX, improved database performance using indexing and partitioning, and ensured secure, compliant banking applications.

Beyond Technical Skills

I work closely with business stakeholders to ensure solutions deliver real value, not just technical completion. With a background in Economics, I focus on the business impact behind every system. I am also comfortable with cross-cultural collaboration and open to travel for project assignments.

I am eager to contribute to Synpulse while growing in a challenging, innovative environment. Thank you for your time and consideration.

Warm regards,

Ayub Miaze

Oracle Developer | FinTech & Banking Specialist
