

How to upload file into collection without page submit in oracle APEX

1. Create page item file browse and use APEX_APPLICATION_Temp_files
2. Create button and use the following code
3. Create ajax process in page process

1. page items

2. function savePdfToCollection() {

```
const loader = document.createElement('div');

loader.id = 'loader';

loader.style.position = 'fixed';

loader.style.top = '0';

loader.style.left = '0';

loader.style.width = '100%';

loader.style.height = '100%';

loader.style.backgroundColor = 'rgba(0, 0, 0, 0.5)';

loader.style.display = 'flex';

loader.style.alignItems = 'center';

loader.style.justifyContent = 'center';

loader.style.zIndex = '1000';

loader.style.color = 'white';

loader.style.fontSize = '20px';

loader.style.fontFamily = 'Arial, sans-serif';

loader.innerText = 'Uploading...';

document.body.appendChild(loader);

const pdfFile = document.querySelector("#P4_FILE_BLOB").files[0];
```

```

if (!pdfFile) {
    alert("Please upload a PDF file.");
    loader.remove();
    return;
}

const reader = new FileReader();
reader.onload = function(e) {
    const base64PDF = e.target.result.split(",")[1];
    apex.server.process("UPLOAD", {
        p_clob_01: base64PDF,
        x01: pdfFile.name,
        x02: pdfFile.type
    }, {
        success: function(res) {
            // alert("PDF saved to collection!");
            console.log("Response:", res);
            apex.region('attachment').refresh();
            document.querySelector("#P4_FILE_BLOB").value = "";
        },
        error: function(err) {
            console.error("Error uploading file:", err);
            alert("Upload failed.");
        },
        complete: function() {
            loader.remove();
        }
    }

```

```

});

};

reader.readAsDataURL(pdfFile);

}

```
